

MEET THE NEW WORLD WIDE LEADER, XCENTRIC CRUSHER.

The world's most technologically advanced crusher bucket with production rates, others can only dream of.

Once again Xcentric Crusher proves why they are in a league on their own.

Xcentric's, XC40 Crusher Bucket, crushing high strength quarry rock to a -50mm aggregate at arate of 40m3 per hour.

Think that's impressive? Open it up to -140mm and watch your production rate climb to a massive 80m3, and that's only if your machine operator can keep up.

XCENTRIC CRUSHER DIDN'T INVENT THE CRUSHER BUCKET, THEY JUST PERFECTED IT.

XCENTRIC CRUSHER

A WHOLE NEW ERA IN CRUSHER BUCKET TECHNOLOGY

BETTER FASTER STRONGER
This is what comes to mind when our clients see the Xcentric Crusher in action.

XCENTRIC CRUSHER, A worldwide leader in the manufacture of advanced hydraulic work tools for extraction and process of rock and concrete. After more than 6 years in the crusher bucket redevelopment phase, Xcentric Crusher has taken the crusher bucket era to a new dimension with the release of the Xcentric Crusher Bucket. In efforts to retain the status of being a worldwide leader, Xcentric Crusher has appointed BOSS ATTACHMENTS as the exclusive dealer for Australia, New Zealand and the Pacific Islands.

HERE'S THE FACTS

- Fully adjustable jaws to give you an output product of -20mm to + 170mm.
- Simple and fast granulometry adjustment system. Allows operators to adjust the output size in less than 2 minutes by removing two simple pins.
- Patented isolating jaw movement, ensure high productivity and quality of the crushed products. This key feature developed by Xcentric ensures the material is crushed without a compacting effect & Guaranteeing at least 35% greater production than conventional crusher buckets.
- Cross Top Jaws: with the circular motion, allows crushing of wet material.
- Double Effect Hydraulic System allows operators to simply reverse the crushing movement in the event of a product jam.
- Process hard materials like granite or porphyry at 100% of the jaw opening.
- 200 Hour Greasing intervals.
- 80% less consumables parts than conventional crusher buckets. No Toggles, No Springs, No Spacing Plates, No Threaded Bars, No Nylon Bushes, No silent blocks.
- Anti-skid Transmission.
- High inertia Power train requires 40% less oil required to operate the crusher bucket, giving you a greater fuel consumption.
- HARDOX® construction ensures long-lasting durability in extreme conditions.
- Designed and manufactured in Spain by Xcentric Crusher, only the best materials are used for excellent quality. Solid, durable and characterized by the now recognizable clean lines designed to resist wear and high stresses in the toughest working conditions.
- Extreme compactness and low centre of gravity improves balance and drastically reduces the strain on the excavator arm, eliminating impact vibrations.
